A new WHO standard population reorders international cancer mortality rankings

Same GLOBOCAN 2024 data for 186 countries, all cancers, standardised two ways

Share of the standard population aged ≥60 years

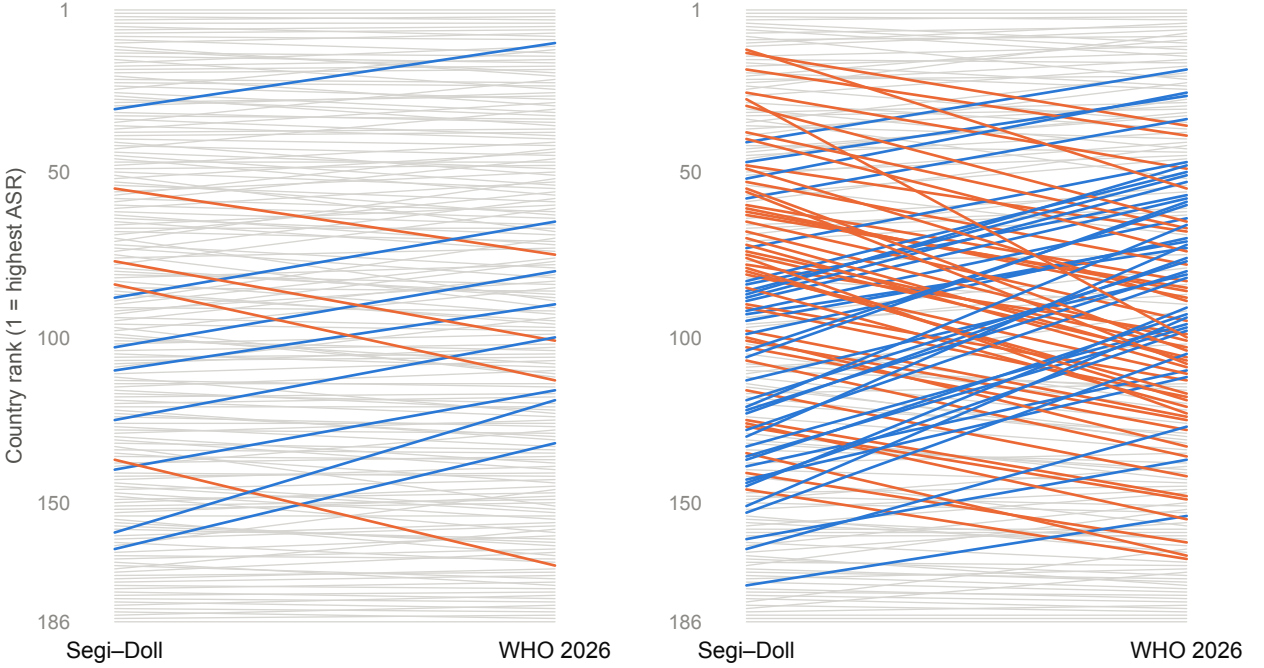

Incidence
12 of 186

countries move ≥20 places · ρ = 0.983

Mortality
79 of 186

countries move ≥20 places · ρ = 0.902

rises ≥20 places falls ≥20 places moves <20 places

Mortality: 6 of the 10 highest-ranked countries remain in the top 10. Report cancer mortality rankings under more than one standard.
